

# Cybercrime Intelligence

## Escalation and Challenges of Cybercrime Threats

Cybercrime is now one of the biggest threats to the global digital economy. From governments to industries like healthcare and finance, no one is immune. Recent cases — Taiwan hospitals crippled by ransomware, international financial institutions hit by data breaches — prove that attacks are accelerating. Organizations need more than alerts; they need intelligence that shows how adversaries think, behave, and operate.

## // The Unique Value of ThreatVision Cybercrime Intelligence

Built on TeamT5's 20+ years of APAC research, ThreatVision Cybercrime (CC) Intelligence provides attacker-focused insights to shift defense from reactive to proactive.

By drawing from the Deep & Dark Web, underground forums, Telegram, and criminal communities, it turns scattered signs into actionable intelligence, focusing on:

- Most recent activities of ransomware and hacker group
- Data trades and attack discussions in dark web forums
- Analysis of emerging attack tools, techniques, and targets
- Provide attack-related IoCs and context

## // ThreatVision Cybercrime Intelligence Reports

<p><b>Cybercrime Campaigns</b></p> <p>Analyze recent cybercrime activities, providing malware execution details and related Indicators of Compromise (IoCs). Published monthly, with at least 12 issues per year.</p>	<p><b>Forum Activities</b></p> <p>Track the latest ransomware developments and discussions across dark web forums, providing data and analysis related to ransomware attacks. Published at least four times per month, with a minimum of 48 issues per year.</p>	<p><b>Ransomware Activities</b></p> <p>Monitor ongoing ransomware activities, delivering information and context on ransomware operations and claimed victims. Published at least four times per month, with a minimum of 48 issues per year.</p>
<p><b>Cybercrime News</b></p> <p>Provide timely updates on recent cybercrime news and significant incidents. Published at least four times per month, with a minimum of 48 issues per year.</p>	<p><b>Cybercrime Tailored Report</b></p> <p>Offer in-depth, client-tailored analyses of disclosed incidents or specific cybercrime campaigns.</p>	

## // Intelligence Beyond Alerts

Unlike generic feeds, ThreatVision CC Intelligence delivers expert-validated depth and context:

Expert In-depth Analysis	Adversary Profiling	Techniques Tracking	Intel-supported Decisions
Comprehensive context beyond alerts	Maps ransomware groups and ecosystems	Follows tools, methods, and targeting for early warning	Links intelligence to business risk for effective decisions

## Benefits Across Defense Layers

ThreatVision CC Intelligence empowers every defense team:

- **SOC & IR Teams:** Fast IoCs and malware details for quicker response
- **Threat Hunters:** Connect behaviors to uncover hidden activities
- **Risk & Compliance:** Integrate threat trends and activities to advance risk control
- **CISOs & Executives:** Use tailored insights to guide strategy and resources

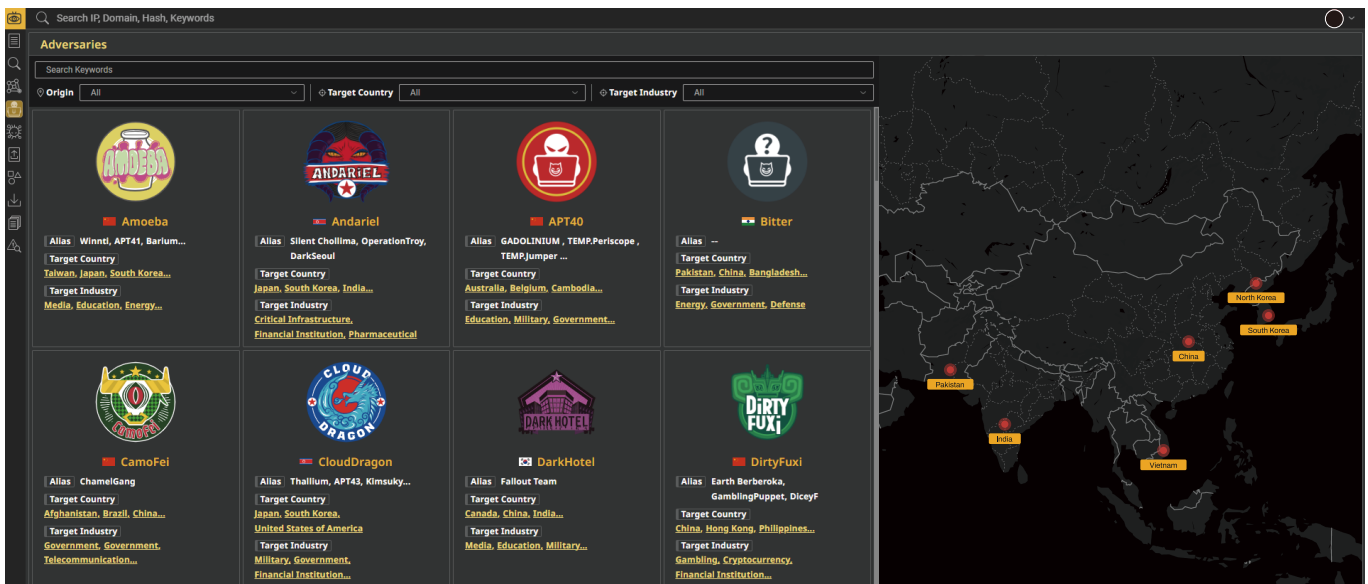

## Wide Application Scenario

With ThreatVision CC Intelligence, organizations gain foresight to act before threats escalate to build up long-term defense resilience:

- **Healthcare:** Pre-empt ransomware targeting to avoid patient data leak
- **Finance:** Track underground data trades to block breaches early
- **Government:** Monitor underground forums for signs of nation-state activities
- **Enterprises:** Understand ransomware tactics and tools for proactive defense

## ThreatVision Platform Overview

ThreatVision's diverse intelligence supports various roles and tasks, helping organizations fully grasp the behavioral patterns of adversaries and proactively deploy defensive strategies. It is the optimal solution from strategic planning to frontline defense.

## Get Started with ThreatVision

Please contact the TeamT5 sales team to request a 14-day trial account for ThreatVision. For further information, please email [sales@teamt5.org](mailto:sales@teamt5.org). We look forward to helping protect your organization from cyber threats.

### About TeamT5

v.202605

Widely trusted by more than 550 customers around the world, including government departments, technology, manufacturing, finance, medical care, military, telecommunications and other industries.

TeamT5 has more than 20 years of experiences in malware and advanced persistent penetration attacks (APT). With language and cultural advantages, we possess specific expertise in cyber espionage in the Asia-Pacific region, and are often invited to present the latest information at world-class cybersecurity conferences, including Black Hat in the United States, Code Blue / AVTokyo in Japan, Troopers in Germany, and Hack In The Box and FIRST. As a world-leading team in the field of threat intelligence research and advanced cybersecurity technology, we have also been interviewed by Bloomberg and CNN in the United States, Sankei Shimbun and Asahi Shimbun in Japan, and ET News in South Korea.
