ThreatVISION

Vulnerability Solutions: Patching & Mitigation All at Once

Three Major Challenges in Vulnerability Management

Modern organizations face three major challenges in vulnerability response and management:

- Rapidly growing vulnerabilities make tracking difficult.
- Excessive noise from multiple sources complicates filtering.
- Unclear patching priorities delay action.

These issues prevent teams from focusing on truly high-risk vulnerabilities. ThreatVision solves this with curated, updated vulnerability intelligence and actionable patching guidance—helping organizations prioritize effectively and build an efficient process.

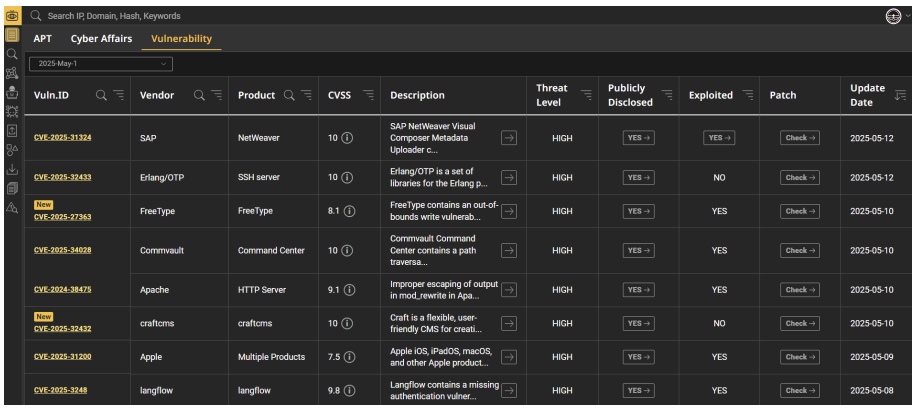
Key Vulnerability Intelligence with Depth and Breadth

Vulnerability Insights Report (aka VIR)

Created by senior analysts, VIR focuses on recently exploited high-risk vulnerabilities. It details attack scenarios, threat groups, and affected industries to assess risk and relevance. Each report includes CVE IDs, CVSS scores, and technical details, with mitigation strategies and detection tools for unpatched vulnerabilities. Published biweekly, 24 issues annually.

Patch Management Report (aka PMR)

Each PMR covers about 100 key vulnerabilities with CVEs, PoC code, CVSS scores, affected products, and patch guidance. It helps teams quickly prioritize fixes under limited resources. Published weekly, 52 issues annually.



Vuln.ID	Vendor	Product	CVSS	Description	Threat Level	Publicly Disclosed	Exploited	Patch	Update Date
CVE-2025-31324	SAP	NetWeaver	10	SAP NetWeaver Visual Composer Metadata Uploader c...	HIGH	YES	YES	Check	2025-05-12
CVE-2025-32433	Erlang/OTP	SSH server	10	Erlang/OTP is a set of libraries for the Erlang p...	HIGH	YES	NO	Check	2025-05-12
New CVE-2025-27363	FreeType	FreeType	8.1	FreeType contains an out-of-bounds write vulnerab...	HIGH	YES	YES	Check	2025-05-10
CVE-2025-34028	Commvault	Command Center	10	Commvault Command Center contains a path traversa...	HIGH	YES	YES	Check	2025-05-10

Threat Hunting Tools Designed for Vulnerabilities

TeamT5 develops detection tools for VIR vulnerabilities, including YARA, Snort, Sigma, and scripts. These strengthen defenses by detecting exploitation attempts and supporting responses.

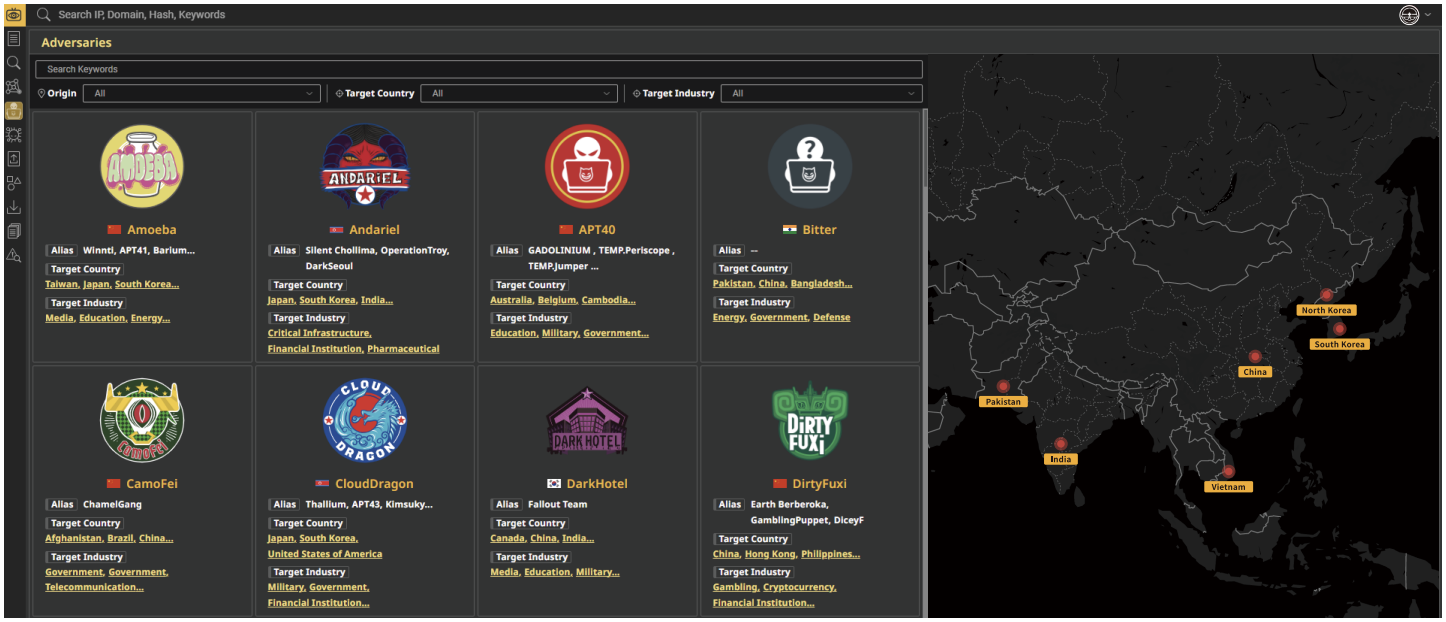
VIR	PMR
▪ In-depth analysis of high-risk vulnerabilities	▪ Weekly list of ~100 vulnerabilities
▪ Real-world scenarios with mitigation methods	▪ Details on affected products and patching guidance
▪ Mitigation strategies and TeamT5-exclusive detection tools	▪ Includes public PoC code
▪ Reduces threats from critical vulnerabilities	▪ Tracks real-world exploitation
▪ 1 report every 2 weeks (24/year)	▪ 1 report per week (52/year)
▪ Available in English	▪ Available in English

ThreatVision PMR + VIR: The Optimal Solution for Vulnerability Response

Organizational Needs		Application
Identify recently exploited high-risk vulnerabilities	→	**PMR Vulnerability Lists:** Identify and address high-risk vulnerabilities, reducing exposure.
Apply effective mitigation for identified vulnerabilities	→	**VIR Mitigation Strategies:** Provide detection rules and defensive recommendations for unpatched vulnerabilities.
Understand affected vendors and products to assess impact scope	→	**Combined PMR + VIR Intelligence:** Consolidate affected vendor and product data to prioritize and allocate resources effectively.

ThreatVision Platform Overview

ThreatVision' s diverse intelligence supports various roles and tasks, helping organizations fully grasp the behavioral patterns of adversaries and proactively deploy defensive strategies. It is the optimal solution from strategic planning to frontline defense.



Get Started with ThreatVision

Please contact the TeamT5 sales team to request a 14-day trial account for ThreatVision. For further information, please email sales@teamt5.org. We look forward to helping protect your organization from cyber threats.

About TeamT5

Trusted by over 300 clients worldwide, spanning industries such as government, technology, manufacturing, finance, medical, military, and telecommunications.

A Team of Leading Experts

Our team members are world leaders in threat intelligence research and advanced security technology, frequently presenting their latest research at world-class cybersecurity conferences. These include HITCON (Taiwan), Black Hat (USA), Code Blue/AVTOKYO (Japan), Troopers (Germany), as well as international events organized by Hack In The Box and FIRST.

Industry Recognition

TeamT5 has been featured in interviews and reports by media outlets such as Bloomberg and CNN in the United States, Sankei Shimbun and Asahi Shimbun in Japan, and ET News in Korea. In 2022, the company received investment from three Japanese industry giants: JAFCO, Japan's largest venture capital group; ITOCHU, Japan's largest multinational corporation with global business investments; and MACNICA, Japan's largest cybersecurity solutions provider.
