

Threat Intelligence Points: Maximizing the Value of Intelligence

To meet varying security needs, ThreatVision offers two point mechanisms, covering everything from real-time queries to advanced analysis:

Automated Analysis Points (AAP)

For real-time queries and sample analysis, helping determine links to known attack activities.

Request for Assistance Hours (RAH)

For accessing reports, tools, or customized intelligence.

ThreatVision Automated Analysis Points (AAP)

AAP enables fast, real-time queries to detect threats early. Common uses include alert triage, Indicator of Compromise (IoC) verification, and sample analysis.

Use AAP For:

IP/Domain/Sample Queries

Cross-check suspicious IPs/domains/hashes with related adversaries, malware, and reports.

Raw Intel Access

Retrieve unpublished observations (e.g. attacker activity, IoCs) for early warning.

Suspicious Sample Analysis

Upload files for automated analysis of malicious programs to support triage and response.

Notes:

- Points are prepaid and can be purchased as needed.
- Deductions are shown before executing sample analysis.
- Ideal for rapid-response scenarios like alert classification and sample detection.

ThreatVision Request for Assistance Hours (RAH)

RAH provides advanced support, covering access to specific report types, tool downloads, and customized intelligence services. It is especially useful for in-depth investigations of particular attacks or threat trends.

Use RAH For:

Report Access	Unlock previously published reports, depending on subscription type.
Threat Hunting Tools	Download YARA, Snort, and Sigma rules that can be deployed directly for faster detection and tracking.
Customized Intelligence Requests (RFI)	Request tailored research with TeamT5's dedicated findings on industries, regions, or attack activities.

Notes:

- Points are prepaid, with required points displayed in advance.
- Usage history available for management and auditing.
- Best suited for background investigation, attribution, and campaign analysis.

How to Choose Between AAP and RAH

AAP	RAH
▪ Query suspicious IPs/domains to check for malicious activity.	▪ Access specific reports and threat hunting tools.
▪ Upload samples for automated analysis.	▪ Submit customization requests on specific topics.
▪ Access raw intel to assess exposure to emerging threats.	▪ Conduct analysis of attack techniques and campaigns.

Immediate Activation for Maximum Intelligence Value

Whether you are an incident responder, SOC analyst, or CISO requiring rapid risk evaluation, AAP and RAH provide flexible options. Contact TeamT5 sales team for deployment guidance.

ThreatVision Platform Overview

ThreatVision's diverse intelligence supports various roles and tasks, helping organizations fully grasp the behavioral patterns of adversaries and proactively deploy defensive strategies. It is the optimal solution from strategic planning to frontline defense.

Get Started with ThreatVision

Please contact the TeamT5 sales team to request a 14-day trial account for ThreatVision. For further information, please email sales@teamt5.org. We look forward to helping protect your organization from cyber threats.

About TeamT5

Trusted by over 300 clients worldwide, spanning industries such as government, technology, manufacturing, finance, medical, military, and telecommunications.

A Team of Leading Experts

Our team members are world leaders in threat intelligence research and advanced security technology, frequently presenting their latest research at world-class cybersecurity conferences. These include HITCON (Taiwan), Black Hat (USA), Code Blue/AVTOKYO (Japan), Troopers (Germany), as well as international events organized by Hack In The Box and FIRST.

Industry Recognition

TeamT5 has been featured in interviews and reports by media outlets such as Bloomberg and CNN in the United States, Sankei Shimbun and Asahi Shimbun in Japan, and ET News in Korea. In 2022, the company received investment from three Japanese industry giants: JAFECO, Japan's largest venture capital group; ITOCHU, Japan's largest multinational corporation with global business investments; and MACNICA, Japan's largest cybersecurity solutions provider.
