ThreatVISION

Raw Intel: The Key Starting Point for Understanding Threats

From TeamT5 Expert Team - ThreatVision Raw Intel

Produced by TeamT5 analysts during front-line research, Raw Intel provides unpublished observations with potential risks. Security teams can use it to spot suspicious activity in real time, filling gaps in timeliness and detail before full intelligence reports are available.

For example, suspicious IPs, domains, or hashes discovered during tracking are recorded as raw intel. Analysts can query and cross-reference these clues to guide further investigation, strengthen defense logic, and accelerate threat identification.

Information vs. Intelligence

ThreatVision' s raw intel is information, not intelligence. Information refers to early observations that are timely but not fully validated, requiring analyst review and cross-referencing. Intelligence, in contrast, is processed and structured to provide reliable, actionable insights.

Raw intel fills gaps before full reports are available. Preliminary findings—such as suspicious IoCs, malware, or infrastructure—offer early leads for investigation. Security teams can use this content to guide analysis or support ongoing cases, and TeamT5 recommends incorporating it into initial workflows while requesting full reports when deeper validation or context is needed.

Benefits of Raw Intel

- Gain timely leads before full reports release.
- Access the latest unpublished observations.
- Early detection of suspicious activity.
- Accelerate incident response and risk assessment.

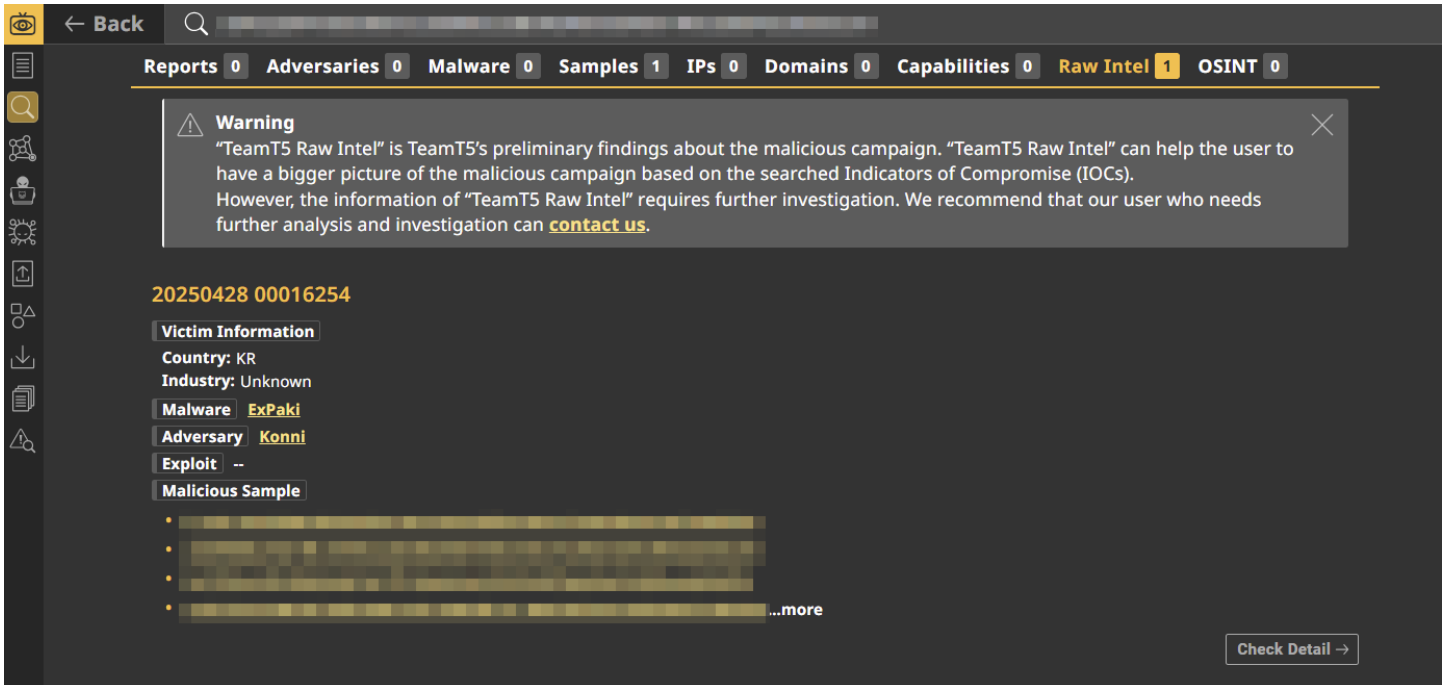
Two Steps to Obtain ThreatVision Raw Intel

Step 1: Identify from Search Results

Keyword searches (IP, domain, hash) show matching raw intel on the “Raw Intel” tab, for users to view preliminary content.

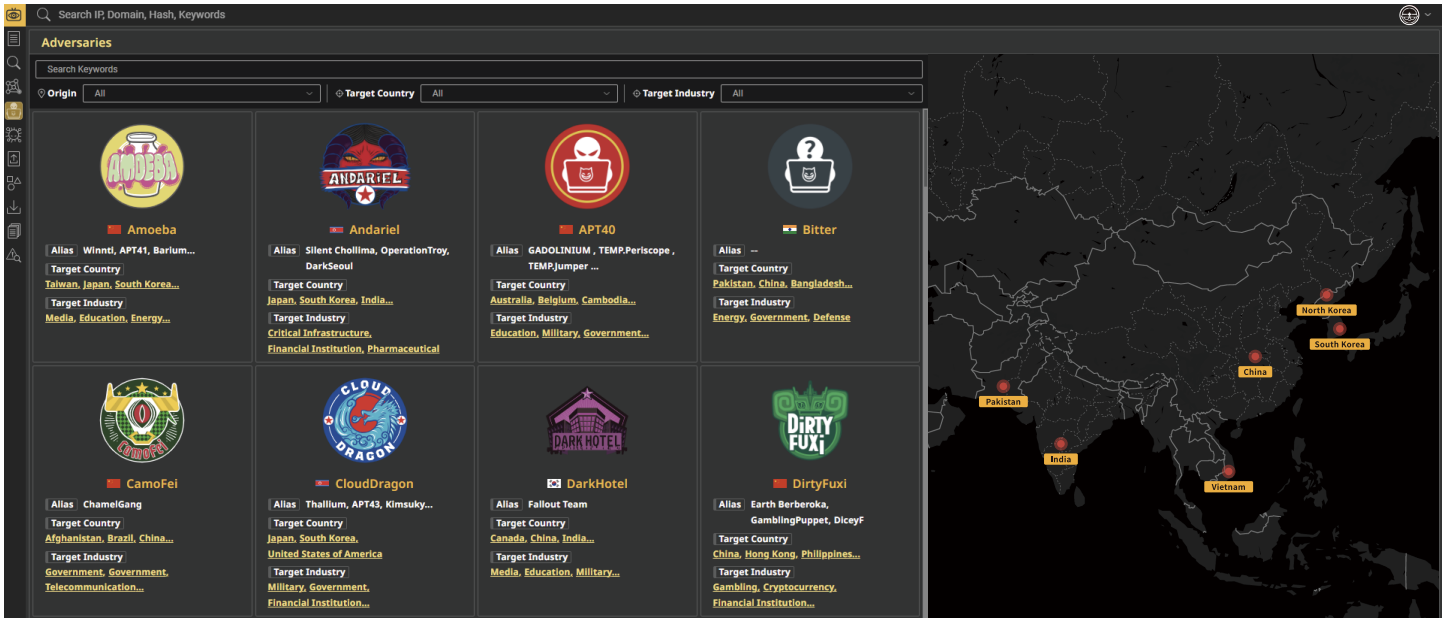
Step 2: Use Credits to Unlock Details

Detailed content is initially masked. Using credits unlocks full information—including targets, adversaries, malware, and exploitation status—helping users quickly grasp the threat context.



ThreatVision Platform Overview

ThreatVision' s diverse intelligence supports various roles and tasks, helping organizations fully grasp the behavioral patterns of adversaries and proactively deploy defensive strategies. It is the optimal solution from strategic planning to frontline defense.



Get Started with ThreatVision

Please contact the TeamT5 sales team to request a 14-day trial account for ThreatVision. For further information, please email sales@teamt5.org. We look forward to helping protect your organization from cyber threats.

About TeamT5

Trusted by over 300 clients worldwide, spanning industries such as government, technology, manufacturing, finance, medical, military, and telecommunications.

A Team of Leading Experts

Our team members are world leaders in threat intelligence research and advanced security technology, frequently presenting their latest research at world-class cybersecurity conferences. These include HITCON (Taiwan), Black Hat (USA), Code Blue/AVTOKYO (Japan), Troopers (Germany), as well as international events organized by Hack In The Box and FIRST.

Industry Recognition

TeamT5 has been featured in interviews and reports by media outlets such as Bloomberg and CNN in the United States, Sankei Shimbun and Asahi Shimbun in Japan, and ET News in Korea. In 2022, the company received investment from three Japanese industry giants: JAFCO, Japan's largest venture capital group; ITOCHU, Japan's largest multinational corporation with global business investments; and MACNICA, Japan's largest cybersecurity solutions provider.
